

STEALTH™ LSO

PDAC APPROVED L0637

STEALTH™ TLSO

SUGGESTED L0464

**Superior Support That's Off The Radar!!!**

When it comes to support and comfort, the **Stealth is King!!!** Easy to put on. Easy to take off. Stealth is our most popular anterior opening soft brace and a true revolutionary 3-in-1 system. Our unique polymer closure straps allow for precise compression and increased spinal support. The Stealth comes with three rigid polymer panels that can be customized for all stages of your patient's therapy. The posterior panel is available in three lordotic curves: 0, 15, and 25. The front and back panels contour to your patient's shape and size.

**COMPLETE CARE**

**3-IN-1**

Post-op Immobilization Brace

Rehabilitation Brace

Corset

The Four Panel Stealth TLSO provides motion restriction for the thoracic and lumbar regions. The posterior extends from sacrococcygeal junction to just inferior of the scapular spine with polymer surrounding the trunk to provide lateral strength. The anterior extends from symphysis pubis to the sternal notch and includes your choice of a thoracic attachment which restricts flexion and encourages proper posture.
