

OMEGA[®] Tracer[®] System

Versatile CAD/CAM technology

Alan Lett family man | caregiver | facility owner | 3rd generation practitioner | CPO

As a legacy O & P practitioner, Alan wants to continue being one of the best centers in the industry. The OMEGA Tracer System helps Alan to realize his goals and create a full range of personalized prosthetic and orthotic devices.

By using the OMEGA Scanner for shape capture, practitioners are able to obtain accurate, three-dimensional electronic images of patient shapes. OMEGA Tracer's intuitive software allows for the shapes to be quickly and accurately modified, fabricated and stored for future reference.
