

OHIO WILLOW WOOD®  
*free the body...free the spirit®*

An Alpha® Select Cushion Liner used with LimbLogic® VS and an Alpha Flex® Sleeve is more than a liner, sleeve and suspension device working together.

*It's a whole new generation of comfort and performance from a prosthesis.*

Circle # 1 on Readers' Service Card

The liner's thin proximal edge adds little bulk to the brim line for attaining an airtight seal

A flexible knee panel allows a greater range of knee motion – even under vacuum suspension

Only 2.5 mm of gel behind the knee delivers comfort when the knee is bent for extended time periods

The liner's fabric stretches circumferentially making it easy to don – no lubricants or lotions are needed
