

PATIENTS SEE

the freedom to spend an afternoon planting perennials

YOU SEE

a prosthetic foot with torsion that lets the patient rotate as naturally as they do on their sound side

Fusion Foot™ with Torsion Receiver

With 48-degree internal and external rotation, it's an entirely new way to offer function without compromise. And it's the result of our constant pursuit of improved prosthetic products—relieving rotational stress, increasing comfort during ambulation, and making movement more natural with every step.

**So you see a satisfied patient.
And they see a satisfying, active future.**

Suggested L-Codes: 5986, 5987, 5984.
