

GOLF PRO SYSTEM

APPLICATION:

- *Golf Pro* models slip over club shaft and then slide up to jam onto the grip.
- Internal plastic sizing rings can be enlarged to custom fit the user's clubs.
- Uniform club grips are recommended.
- ½ in. diameter threaded stud fits any USA made wrist units.

- *Golf Pros* provide for a fluid backswing and downswing with excellent control and are easy to use.

CUSTOM TRANS HUMERAL

AMPUTEE GOLF GRIP (AGG)

PRODUCT CODE: DPAGGO

Length: 6.0 in. (152cm)

Weight: 10 oz. (283 gm.)

Replaces upper hand on club grip.

- **(One model only)** The *Amputee Golf Grip* is a versatile golf aid, which has the advantage of being instantly adjustable to any club grip diameter. This allows the user to be able to position the device anywhere on the club grip.
- A sound (opposite) hand is required to secure the AGG onto the grip, locking it in place ensuring that the device cannot slip. The design allows for full rotation on the backswing, squared

club face at impact and a complete follow through during the downswing.

- ½ in. diameter threaded stud fits any USA made wrist units.
