

Elevating lives. All the way to the ground floor.

Ability's approach to care begins as soon as the patient enters our doors. All of our facilities are located on the ground floor in prime medical locations, with features such as power doors, wide hallways and gait rooms. In this comfortable environment, patients find practitioners of the highest caliber, with Prosthetic & Orthotic degrees, who are focused on providing the absolute best fit for their needs. We ensure this via our in-depth, objective outcome protocols. In addition, we outsource our orthotic/prosthetic fabrication to manufacturers who can provide consistency and repeatability so that we can accurately and precisely design products for each patient. Contact us to learn more about how we're elevating the lives of our patients.
