

## IT'S TIME TO RAISE EXPECTATIONS AND ADJUST YOUR THINKING.

SAVE TIME, MONEY AND FRUSTRATION  
WHILE PROVIDING GREATER PRECISION  
AND ADJUSTABILITY WITH THE KINETIC  
REVOLUTIONS ADJUSTABLE PYLON.

Introducing a new twist on an old component for patient and practitioners alike. The Kinetic Revolutions Adjustable Pylon features precise height and rotation adjustments without removing the socket or foot. The adjustable pylon significantly reduces patient appointment time by eliminating the need to cut pylons to size, sand and buff the cut ends and re-attach the socket and/or foot. As a result patients and practitioners could save an average of 15 to 20 minutes per visit and off-site visits can become more efficient and therapist-friendly. Find out how this revolutionary device can transform your practice today. Visit us at [www.kineticrevo.com](http://www.kineticrevo.com) or call 301-360-3520.
