

LIVINGSKIN[®] Premier Clinical Services Are Now Available in Atlanta, Chicago and Toronto!

LIVINGSKIN[®] is proud to offer Premier Clinical Services in Atlanta, Chicago and Toronto. At a Premier Clinical Service Center, patients have the option to sit with the artists while having their high definition custom silicone prostheses painted to match their unique skin color. Prior to offering this service in Atlanta, Chicago and Toronto, patients were required to either travel to New York to have color matching done in person or have the prosthesis painted to match photographs.

Although the distance photo matching process has produced hundreds of satisfied patients, it is recognized that a face to face session between the artist and the patient is the most effective method for matching skin color. Therefore, *LIVINGSKIN*[®] has established Premier Service Centers in order to offer a clinical service environment where color matching is optimized in convenient locations in North America.

“The response to offering this level of clinical services has been tremendous. We are pleased and excited that our unique services are more accessible than ever.” said Tom Passero, C.P. and President of Aesthetic Concerns Prosthetics, Inc.

LIVINGSKIN[®] makes prostheses for finger, hand, toe, foot, ear and facial amputations as well as custom prosthetic skin covers for arm and leg amputations. These devices have been recommended by hand surgeons, prosthetists, hand therapists, case managers and anaplastologists. Every device is hand-crafted and custom made to match the features which are unique to each patient.

With *LIVINGSKIN*[®] you can be certain you'll receive the most realistic, aesthetic restoration available. Please direct any questions about their unique services as follows:
