Announcing Premier Service Centers!

LIVINGSKIN[®] now offers Premier Clinical Services in Atlanta, Chicago, Middletown and Toronto. At a Premier Service Center, you sit with an artist, while having your high definition silicone prostheses painted to match your unique skin color. Prior to this service you were required to travel to New York for color matching or have the prostheses painted to match photographs.

LIVINGSKIN[®] makes prostheses for finger, hand, toe, foot, ear and facial amputations as well as custom prosthetic skin covers for arm and leg amputations. These devices have been recommended by prosthetists, surgeons, therapists, case managers and anaplastologists. Every device is made to match features unique to each patient.
