Custom Orthotic Insoles

CAD/CAM Suite

Are your orthotics made with accuracy and consistency?

Delcam's Custom Orthotic Insole solution provides laboratories, medical clinics and practitioners with the latest technology to automate the process of delivering custom orthotics.

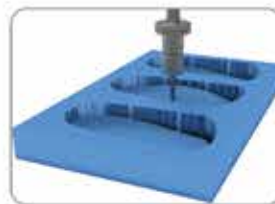

Starting with a powerful 3D scanner, our iQube scanners have a high level of accuracy which means that you get a custom orthotic that is right the first time. Your time is minimized and the quality that you can deliver to your clients is improved.

Unsure about changing your entire CAD/CAM system?

We recognize that shifting from one system to another can present uncertainty. With our open system you can use one process or a complete solution for scanning, designing and manufacturing.
