ORION³

Microprocessor Controlled Knee

New features:

Inertial measurement unit

Standing support mode

3 day battery life

Weatherproof

Enhanced stability. Efficient motion.

Intelligent microprocessor control you can depend on.

echelon VAC

Optimal socket connection is critical to an amputee's comfort, security and stability. By pairing Biomimetic Hydraulic Technology with an elevated vacuum system, the design of EchelonVAC works to create a secure and comfortable socket connection.

Exceptional control and comfort
