

Switch Your Limb in Seconds ...

- *Exchange components or entire limbs easily.*
- *Avoid cramps. Remove your limb in tight spaces — cars, planes, or theatres.*
- *Stay mobile. Attach a temporary component while your prosthesis is being repaired.*

... with the Ferrier Coupler

The Ferrier Coupler is a quick disconnect device that lets you interchange virtually any component below the socket — knee, pylon or foot — in any combination for as many prosthetic options as you can imagine — anywhere, anytime.
