Description

The OrlandoLux™ is a soft, tri-lam fabric orthosis for comfortable torso support and aggressive spinal motion restriction. It features anterior and posterior pockets containing rigid molded polymer panels, and lateral pockets containing more flexible polymer panels. The OrlandoLux is a modular system - each piece is separately attached by hook and loop panels, allowing the orthosis to be fit with impeccable precision. The OrlandoLux's unique elastic strapping creates effective compression with minimal bulk, yet the orthosis is quick and easy to don and doff.
