

Nabtesco

ALLUX™

The world's first 4-Bar Hydraulic MPK

The world's first 4-Bar hydraulic microprocessor stance and swing phase controlled knee.

Nabtesco, leaders in microprocessor knee technology, have once again driven innovation forward with their new design.

We are in pursuit of the world's safest knee.

The unique concept boasts a dual safety system based on great toe clearance by polycentric design and microprocessor control.

The ALLUX knee heightens safety and security while providing exceptional functionality for the user.
