

NEW! The SmartSoc with Samsung S7 Video Scanning Capabilities has been released!

The clinically proven pocket-sized 3D image capturing system.

The SmartSoc® 3D Capturing System is the latest addition to Orthomerica's US FDA 510(k) cleared line of image capture devices for manufacturing of STARband® and STARlight® Cranial Orthoses.

SmartCam™ for Fast, Safe, and Accurate Video Scans

- Samsung Galaxy S7 with Android Operating System
- User Friendly—Requires no Special Training
- Accurate to 0.1%
- Generic Head Model on the S7 Display Shows Real Time Scan Progress
- Scanning Halo Turns Green, Indicating Optimal Stand-Off Distance
- Allows Patient Movement During Scans
- Portable—easily taken to clinics and satellite offices

Preorder your SmartSoc Samsung S7 Smartphone from Orthomerica as soon as possible, as these phones may backorder over the holiday season!

CurveCapture™ App Converts 2D Video to a 3D model

- Revolutionary Technology Analyzes 2D Video Frames for Optimal 3D Conversion in the cloud
- HIPAA Compliant

eBrace® Web Portal

- Allows Users to Review the 3D Model
- Platform for Ordering STAR® Family of Cranial Remolding Orthoses

Product Offerings

- STAR Family of Cranial Remolding Orthoses
- Custom Protective Helmets
- Prosthetic Module Coming in 2017
- More Modules to Come!

The SmartSoc System eliminates the need to take messy, expensive, time-consuming & less accurate plaster casts.
