

WalkOn Reaction Junior

Aqualine Junior Ankle Joint

Keep Kids Moving

with AFO solutions from Ottobock

You can now fit your pediatric patients with a full range of Ottobock Pediatric AFO solutions from the **NEW!** WalkOn® Reaction Junior to the **NEW!** Aqualine Junior Waterproof Ankle Joints.

The WalkOn Reaction Junior offers the same dynamic properties as the WalkOn Reaction, but in a pediatric size. It is easy to trim/fit, durable and provides all day comfort. This durable, lightweight, dynamic lower leg orthosis features a slim design that is inconspicuous and comfortable – the perfect solution for your pediatric patients.

The Aqualine Junior is not only waterproof but durable, versatile and also lightweight, perfect as an everyday brace while suitable for swimming and water-related activities.

Whether it is the dynamic WalkOn Reaction Junior, waterproof Aqualine Junior, self-aligning flexible X-ible joints, plantar flexion SNAPstop™, or the lightweight customizable Carbon Ankle Seven, there are many AFO options available to best suit your patients' specific needs.

For more information on these new pediatric orthotic solutions or to schedule a free trial of the WalkOn Reaction Junior, contact your Ottobock Sales Representative.
