

Standard or Custom Fit

The **PRO 180 Patella Brace** provides excellent patella control in a time tested design (U.S. Patent #4,084,584). The orthopedic felt buttress is positioned under the neoprene sleeve, taking advantage of the added compression, to provide positive patella control. Lateral and medial spiral stays lend additional support. Available in off-the-shelf sizing for same day shipment or in a custom fabricated exact fit with 48 hour turn-around.
