

# Are you currently using the highest quality composite materials?

**REDUCE  
SOCKET WEIGHT UP  
TO 50%**

## You are if you're buying SPT Materials!

SPT Technology, Inc. has competitive prices on braided structures, woven cloths, knitted tubular products and many more raw materials. Sold in North America since 1995. Available soon in the United Kingdom.

## Why choose SPT materials?

- SPT composite materials are an excellent choice when the desired effect is a strong/thin walled prosthesis.
- SPT composite materials have been treated to be compatible with all commonly used resins in the orthotic/prosthetic community.
- Our nylaglass is made exclusively for SPT with a very sheer texture. It is 60% fiberglass to 40% Nylon with such a fine texture it may be used as a thin strong finishing layer.

## Braided products are available

in lengths of 3.05m (10ft.), 9.15m (30ft.), 15.25m (50ft.) and 30.5m (100ft.);  
in widths of 2.5cm (1in.) to 25cm (10in.)
