## The Development of Gait: Back to the Beginning

This spring, Surestep is excited to present a new continuing education course focused on understanding the foundations of gait development. As members of the health care team treating patients with gait deviations, we need to get back to the basics to determine the best potential solutions, both orthotically and therapeutically. This course will focus on the development of gait and postural control and the deviations we commonly see in our patients. We will discuss how these factors work independently as well as how they interact with one another to affect the development of gait and postural control.

**For the full course description, visit [surestepacademy.com](http://surestepacademy.com).**

**FREE**  
Webinars

Surestep webinars deliver the same educational content as traditional courses, but in a more convenient format, live streamed to your computer! These courses typically last 3 hours and certified practitioners and physical therapists are able to earn continuing education units (CEUs vary by state).

**For webinar dates and registration, please visit our website.**
